Problem: The logo is missing on the second page(2.2).

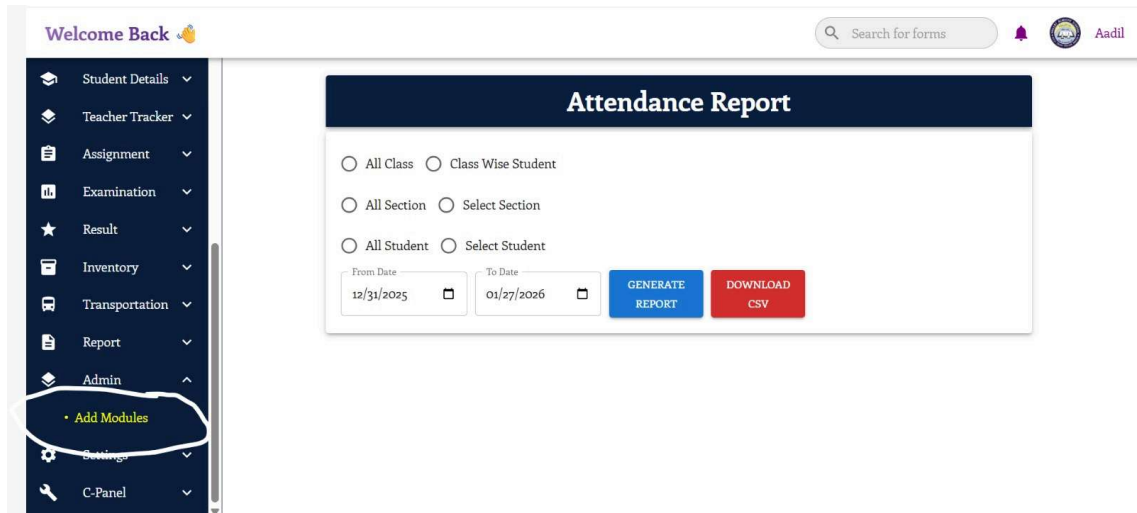

3)

The screenshot shows a web application interface. At the top, there is a header with "Welcome Back" and a search bar labeled "Search for forms". On the left, a sidebar menu lists various categories: Examination, Result, Inventory, Transportation, and Report. Under the Report category, there are sub-items: PaymentReport, Admission Report, Inventory Report (highlighted), and AttendanceReport. Below these are Admin, Settings, and C-Panel. The main content area is titled "Inventory Report" and contains a "Stock Issue Report" section. This section has two date pickers: "From Date" set to "12/27/2025" and "To Date" set to "01/27/2026". Below the date pickers are three buttons: "GENERATE REPORT" (blue), "DOWNLOAD CSV" (red), and "CLEAR FIELDS" (white). At the bottom of the main content area, there are three expandable sections: "Stock Return Report", "Stock Summary Report", and "Stock Movement Report".

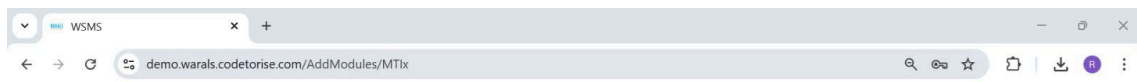

Problem: When I click on the Inventory Report page, the notification on the page is not showing as a Snackbar-style notification.

This screenshot shows the same "Inventory Report" page as the previous one, but with a notification overlay. The notification is a white box with a blue border, containing the text "demo.warals.codetorise.com says" and "No Record Found! Try another date". There is a blue "OK" button in the top right corner of the notification. The background of the page is dimmed, showing the same sidebar and main content area as before.

4)

Problem: When I click on Add Modules, it shows a blank page and does not work. Also, the image data at the bottom is displaying incorrectly.
